## RISK DISCLAIMER

(For Customers Regarding Leveraged Asset and Derivative Instrument Trading Transactions  
General Comments)

In addition to the issues specified in the "Framework Agreement" to be signed with the brokerage house you will be dealing with regarding leveraged asset and derivative instrument trading, it is very important that you understand the following points.

- The account you will open with the authorized institution and through this account

All transactions will be carried out on the Meta Trader platform.

will be recorded.

---

- Leveraged assets and derivatives trading transactions are risky. leverage effect

Therefore, trading with low collateral may work in favor of the market.

It can work against you and in this sense, the leverage effect is high on your side.

There is always the possibility that it may cause gains as well as high losses.

should be taken into account. As a result of adverse price movements, the brokerage firm

You may lose all of your deposited money. Therefore, your savings are only

Allocate the portion you can afford to lose for these transactions. high return

Do not trust their promises.

- Leveraged asset trading and futures contracts, stock market

derivatives such as options, CFDs, over-the-counter currency options and forwards

transactions carry a high degree of risk. Compared to the contract value of the related derivative transaction

the initial deposit amount may be small; so trades are "leveraged". This

Therefore, you have deposited or deposited a relatively small market movement.

a proportionally greater impact on the funds you will have to raise will do. This can work in your favor as well as against you. Formed due to price movements, your initial margin amounts and your position to protect the collateral you hold in your account or You can lose more of it completely.

- The personal rights of the employees of authorized institutions, the customers they are responsible for, the transaction collateral amounts deposited in their accounts, the increase in these collateral amounts and may be making improvements according to similar criteria. Therefore, the Investment Institution There may be a conflict of interest between the employee and the customer. Client Investment Firm always take this conflict of interest into account in his communication with his employees. should have.
- In leveraged asset and derivative instrument trading, the Investment Institution is on the opposite side. With these transactions, the Investment Institution, the seller against the buyer, is the buyer against the seller, and due to the nature of the service provided, the customer cases where it makes a loss will result in the Investment Institution making a profit.
- Opened in leveraged asset and derivative instrument trading or starting point to constitute the collateral for every position you wish to open. You must have a warranty. Initial and maintenance collateral Within the rates specified in the framework agreement you will make with the Intermediary Institution. Intermediary Institution will be applied in case you fall under the maintenance guarantee. is authorized to close positions in the account.
- Information that the brokerage house will convey to you regarding the transactions you will make, and your advice may be incomplete and in need of verification. It must be taken into attention.
